EDUCATION

Pampanga State University (formerly Don Honorio Ventura State University) <i>Bachelor of Science in Computer Engineering (GWA: 1.4331)</i> Dean's Honors List, Cum Laude Honors	Aug 2025 Bacolor, Pampanga
---	--------------------------------------

SKILLS

Hardware: Computer Assembly and Troubleshooting, PCB Design (KiCAD), Circuit Simulation (Proteus), Soldering, Fiber Optic Testing, Splicing, and Ethernet (RJ45) Termination & Testing

Software: HTML, CSS, Python, Video Editing (Adobe Premiere Pro)

EXPERIENCE

Self-Taught PC Builder & Troubleshooter <i>Freelance IT Technician</i> - Built and configured 10+ custom PCs for clients and peers, tailored to performance and budget needs. - Diagnosed and resolved hardware and software issues (boot errors, overheating, driver conflicts), reducing system downtime and extending device lifespan. - Upgraded and customized PCs for gaming, CAD, and video editing, resulting in up to 40% performance improvement compared to stock configurations. - Applied knowledge in Windows OS installation, BIOS configuration, hardware compatibility, and peripheral integration to deliver stable, high-performance systems.	Mar 2019 – Present
---	---------------------------

Pampanga High School (PRO-MIS Department) <i>Computer Engineer Intern</i> - Troubleshoot and resolved hardware and software issues for faculty and staff, ensuring minimal downtime and smoother daily operations. - Assisted in configuring and maintaining network systems, improving connectivity and reliability for school administrative use. - Provided IT support to 50+ faculty members, resolving 100+ hardware/software/network issues during internship, strengthening technical knowledge and problem-solving abilities.	Feb 2025 – May 2025 City of San Fernando, Pampanga

PROJECTS

Dual-Controlled Robot for Fire Suppression Using Low-Frequency Sound Waves

- Designed and fabricated the **robot chassis and custom PCB (KiCAD)**, integrating a Raspberry Pi 4B with Python-based control software.
- Implemented **multi-sensor navigation (ultrasonic + flame sensors)** and a **low-frequency acoustic suppression system**, enabling both autonomous and remote fire control.

24 Volts Power Supply Unit

- Designed, assembled, and tested a **PCB-based DC supply (12-24 V)** for electronics projects.
- Integrated a **rotary potentiometer with LED indicator** for accurate, adjustable voltage control.

Business Websites (CM Private Rest House & AJP Car Rental)

- Designed and developed **responsive websites** using HTML, CSS, and JavaScript, tailored to showcase services, amenities, and location for small businesses.
- Integrated **booking and reservation systems with contact forms**, streamlining client reservations and improving customer engagement.
- Optimized site structure and layout with **photo galleries and responsive design**, enhancing accessibility across desktop and mobile devices.
